Who Am I? Video Challenge QUESTIONS

While you watch the **Who Am I Challenge video**, answer these questions. Pause the video after each bird's introduction and test your bird identification skills!

1. The first bird is a(n) _____; a small, sparrow-sized bird with a black cap.
2. What have these two birds been working together to do? _____
3. Why would they fly to another tree to drop their wood chips, instead of dropping them right out of the hole?

4. The second bird is a(n) _____; a large, all-black bird.
5. Why is this bird singing and dancing on the branch? _____
6. The third bird is a _____; a teeny-tiny bird with special flight skills. The one in the video is: male/female (circle one).
7. You won't see them at a regular bird feeder, because they drink _____
8. The fourth bird is a(n) _____; a medium-sized, brown bird with an orange belly.
9. Why do you think males of this species would be flying into windows repeatedly? _____

10. The fifth bird is a(n) _____; a small, bright yellow bird.
11. What do you think this bird eats? (hint: it is hunting in the video) _____
12. The sixth bird is a(n) _____; a large water bird with a green head.
13. When they put their tail feathers in the air and their heads under water, it's because they are _____

Who Am I? Video Challenge ANSWERS

Sure, you COULD read these before watching the video... but it would ruin all the fun!

1. The first bird is a **Black-capped Chickadee**; a small, sparrow-sized bird with a black cap.
2. What have these two birds been working together to do? **Hollow out a cavity into this tree so they can nest in it.**
3. Why would they fly to another tree to drop their wood chips, instead of dropping right out of the hole? **Any guess could be the correct answer... It could be to prevent nearby predators from realizing there is a nest in the tree.**
4. The second bird is an **American Crow**; a large, all-black bird.
5. Why is the large bird singing and dancing on the branch? **This is a mating ritual, the crow is trying to attract a mate.**
6. The third bird is a **Calliope Hummingbird**; a teeny-tiny bird with special flight skills. The one in the video is: **male.**
7. You won't see them at a regular bird feeder, because they drink **nectar.**
8. The fourth bird is an **American Robin**; a medium-sized, brown bird with an orange belly.
9. Why do you think males of this species would be flying into windows repeatedly? **The bird in the video probably thinks he is in a fight with another robin (his reflection in the window) and is trying to defend his territory. Ouch!**
10. The fifth bird is a **Yellow Warbler**; a small, bright yellow bird.
11. What do you think this bird eats? (hint: it is hunting in the video) **insects.**
12. The sixth bird is a **Mallard duck**; a large water bird with a green head.
13. When birds put their tail feathers in the air and their heads under the water, it's because they are **eating water plants.**
